

Poland, November 24-25th, 2023
Class II Malocclusion Course from Childhood to Adulthood

Course Director: Dr. Vittorio Cacciafesta, Milano, Italy

AIMS of the Course

Delegates who attend this orthodontic course will be given the tools, techniques and confidence to immediately treat mild to severe Class II skeletal and dental malocclusions. You will learn about the fundamental bases of interceptive and multibracket orthodontics and understand the importance of biomechanics in the various treatment phases of Class II malocclusion from childhood to adulthood.

You will learn about the clinical principles and limitations of different orthopedic appliances and orthodontic bracket systems with regards to the facial type and vertical control of each patient.

You will learn the importance of a careful diagnosis and how to screen your patients to select those cases suitable for interceptive orthodontic treatment or multibracket therapy.

Interceptive treatment of skeletal discrepancies

- **Transverse discrepancies:**
 - Rapid maxillary expander – conventional and on acrylic splints
 - Conventional Quad Helix – Ni-Ti Quad Helix
 - TPA with and without extensions
 - Acrylic plates
 - Lip bumper
 - Lingual arch
- **Sagittal discrepancies:**
 Class II malocclusion therapy:
 - Headgear – Headgear Cervera type
 - Activators - Monobloc - Bass – Fränkel – Bionator – Teuscher - Twin Blocks - Sander Bite Jumping
- **Vertical discrepancies:**
 Deep bite therapy:
 - Cervera Plate - Double plates - Headgear Cervera type - Activators
 Open bite therapy:
 - Cribs - Plates with cribs – Activators - Bite blocks

Interceptive treatment of skeletal asymmetries

Treatment of Class II malocclusions in subjects at the end of growth

- Class II elastics
- Herbst appliance
- Jasper Jumper, Easy Fit Jumper, SARA and similar appliances

Maxillary molar distalization appliances

- Wilson, Jones Jig, Repelling magnets, Open coils, Ni-Ti wires, Pendulum, Distal Jet, First Class, Fast Back, Frog...: Advantages and Disadvantages of each system in the clinical practice.
